DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claims 1-4 are also rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1 recites, "wherein the adjustable delay is adjusted according to a driving habit." While this limitation has antecedent basis in the original disclosure, it appears only as a suggestion and is not described in a manner sufficient to enable one skilled in the art to make or use the device nor in a way which reasonable conveys to one skilled in the art that the inventor had possession of the invention. It is not clear if this feature is a step of actively modifying the orifice during braking or before the system is started. It is also not clear what method and

means by which the driving habit is determined, and the manner in which such determinations affect the adjustment of the orifice.

Response to Arguments

Applicant's arguments filed 8/31/2005 have been fully considered but they are not persuasive.

While Applicant's arguments and submitted evidence has been considered, it is maintained that the claimed features of adjustment according to driving habit is not adequately supported. The references cited by Applicant relate to adaptive transmission controls, which show that it is known to determine driving habit to modify shift points. However, it is maintained that the aspects of determining a driver habit in the environment of a braking system, which qualities of driving habit are significant, and further the relation of such determinations to control of a hill hold or start assisting system are not adequately disclosed and would require undue experimentation.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
